

***Arenaria serpyllifolia* L. subsp. *lloydii* (Jord.) Bonnier**

Thyme-leaved Sandwort

Native

GB: Waiting List

England: Waiting List

VC5 Extinct?; VC6 Extinct?

An annual of dunes and other coastal habitats. This subspecies has been variously treated as distinct (eg by Perring & Sell, 1968) or as synonymous with subsp. *serpyllifolia* (eg by Stace, 1997 and Preston *et al.*, 2002), but is currently recognised again (Stace, 2010). As a consequence of its fluctuating status, the distribution of this subspecies is unclear. In Somerset, Perring & Sell (1968) mapped it (as subsp. *macrocarpa*) from ST24, ST35 and ST36, but there have been no subsequent records. This taxon may be overlooked in Somerset, not extinct.
