Dactylorhiza x wintoni (A. Camus) P.F. Hunt (***D. incarnata x praetermissa***)

Native

VC5 Absent; VC6 Extinct

A sterile hybrid orchid of base-rich marshes, recorded only once in Somerset. Found in marshy enclosures on Shapwick Heath in 1947 by Mrs C.I. and N.Y. Sandwith. There are no subsequent records for Somerset for this rare hybrid, which has been found at scattered sites in England and Wales.
